PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable web applications, event-driven B2B SaaS ecosystems, and robust IoT platforms using React, Next.js, Node.js, and Go. Proven track record of architecting full-stack solutions with clean separation of concerns, designing visual workflow GUIs, and delivering production-ready platforms for enterprise clients. Passionate about component-driven development, system reliability, and contributing to open-source architectures.

PROFESSIONAL EXPERIENCE

Cairo Studio

Full Stack Developer (Freelance)

Remote

Oct 2025 – May 2026

- Architected and shipped 9 production web platforms across the legal, tourism, and logistics domains (including CDH, Kaiman, Yalla Egipto, and Freight Egypt), enhancing digital business operations and user engagement.
- Engineered full-stack solutions utilizing Next.js, Nest.js, and PostgreSQL, ensuring a strict architectural separation between API, business logic, and data access layers.
- Integrated Prismic headless CMS, empowering clients with flexible, dynamic content modeling to easily update page texts without developer intervention.
- Built and optimized RESTful APIs for reliable concurrent usage and integrated Stripe payment gateways with secure webhooks to facilitate safe e-commerce transactions.

SCorp Network

Full Stack Engineer

Remote

Dec 2024 – Oct 2025

- Contributed to the development of a hybrid IoT automation platform for local factories, enabling users to orchestrate visual workflows.
- Developed an interactive frontend GUI using React Flow, Next.js, Redux, and Tailwind CSS, granting users the flexibility to visually connect nodes, sensors, and actuators.
- Implemented real-time device communication via MQTT and a Node.js/Express.js backend, optimizing connection handling and ensuring high message reliability.
- Designed and enforced a policy-driven access control system to manage dynamic permissions and REST APIs based on strict user roles.

VODO

Frontend Developer Intern

Remote

Jul 2024 – Sep 2024

- Refactored core modules and built new features for large-scale enterprise ERP systems, improving workflow flexibility for real users and client companies.
- Implemented a scalable UI architecture using React, Next.js, and Tailwind CSS, efficiently managing complex application state, caching, and routing via Redux.js, React Query, and React Router.

Inspire Web

Frontend Creative Developer

Remote

Jan 2024 – Mar 2024

- Engineered a highly flexible template system for a no-code website builder, successfully translating complex Figma designs into pixel-perfect interfaces.
- Developed isolated, reusable UI components documented within Storybook to streamline developer hand-off and ensure design consistency.
- Delivered premium, highly interactive web experiences by utilizing React, Next.js, GSAP, and Framer Motion for complex animations.

SELECTED PROJECTS & OPEN SOURCE

Sapliy | Microservices Payment Platform

[GitHub: sapliy](#)

Go, gRPC, Kafka, PostgreSQL, Docker

- Designed an event-driven microservices architecture simulating comprehensive wallet, authentication, and transaction processing services.
- Developed foundational NPM packages and Go modules to streamline automation workflows within B2B SaaS ecosystems.
- Implemented synchronous inter-service communication via gRPC and asynchronous messaging via Kafka, utilizing idempotency handling for reliable transaction execution.

Yalla Egipto | Tourism Platform

[yallaegipto.com](#)

Next.js, Stripe, PostgreSQL, Prismic CMS

- Built a multilingual, SEO-optimized booking platform featuring secure Stripe checkout flows and a comprehensive order management admin dashboard.

GoCanopy | Institutional Real Estate

[gocanopy.tech](#)

Next.js, Prismic CMS, GSAP, Cloudflare

- Engineered pixel-perfect landing pages translated from Figma, implementing GSAP animations for premium visual storytelling and Prismic CMS for dynamic content management.

Sky Trading | MEP Solutions E-commerce

[sky-ff.com](#)

Next.js, Prismic CMS

- Built an industrial e-commerce platform for MEP solutions and firefighting equipment, featuring multi-language support and dynamic product pages.

IoT Automation Platform

React, React Flow, Node.js, MQTT

- Built a workflow-based visual editor using React Flow for device automation, implementing real-time device state synchronization and a policy-driven access control system.

Corporate & Agency Web Platforms

Next.js, Nest.js, Prismic CMS

- Architected and delivered highly performant, CMS-driven production platforms for enterprise clients across legal, tech, and corporate sectors, including [CDH](#), [Kaiman](#), [DKS Group](#), [ESCA Egypt](#), and [The Viral Hub](#).

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Go, Python
- **Frontend:** React, Next.js, Nuxt.js, Tailwind CSS, Redux, React Query, React Router, React Flow, GSAP, Framer Motion, Storybook
- **Backend:** Node.js, Express.js, Nest.js, Go, gRPC, RESTful APIs
- **Databases & Messaging:** PostgreSQL, MongoDB, Redis, Kafka, RabbitMQ, MQTT
- **Tools & Infrastructure:** Docker, Git, Prismic CMS, Stripe
- **Concepts:** System Design, Microservices, Event-Driven Architecture, Clean Architecture

EDUCATION & LANGUAGES

Alexandria Advanced Technical School

Specialization in Electrical Energy Transfer and Distribution

Maharram Bek, Egypt

Expected Jun 2026

Languages: Arabic (Native), English (Professional Working Proficiency)
